

CHIEF FINANCIAL OFFICER – Massy (91), France

About Quandela

Quandela is a European start up that provides photonic quantum computers that are modular, scalable, energy-efficient and accessible both on the cloud and on premise. Our team specialises in the development of both software and hardware solutions for a variety of quantum applications. We offer a wide range of services, from developing the most efficient and brightest single photons sources, to creating algorithms for quantum computers and providing cloud quantum computing solutions.

Your Role

Reporting to the CEO, working closely with the COO, the CFO is able to take key responsibilities and manage the financials of the company in all its aspects, from cash flow, planning, reports and dashboards helping to drive the company's financials and articulating Quandela's vision to different stakeholders.

The CFO will have a day-to-day, ongoing impact on company operations, helping the company to analyse, strategize and grow its financial position.

As a member of senior management, the CFO will be comfortable in a leadership role that requires clear and effective communication skills, highest standards of personal discipline, integrity, humility and ethics. He/She is recognized for his/her results orientation, proven execution capability and leadership with a wide perspective from financial strategy to operation.

Objectives:

- will co-develop the strategic financial plan for scaling, while building out company's financial infrastructure (including international subsidiaries) and processes in collaboration with business, product and R&D teams,
- move the organization away from bean-counting and toward more strategic financial planning,
- ensure that cash flow is compatible with company's plans; build and oversee the dashboard and reports.
- Share insight and analysis across the management team and down into the organization so that decisions are made using sound financial data.
- Secure loans and capital from the right financial partners
- Assist in the preparation of financial reports and review, as their communication with the board of directors.

In a nutshell, the CFO is responsible for tracking cash flow and financial planning and analyzing the company's financial strengths and weaknesses and proposing strategic directions.

Main Tasks

Financial planning and analysis (FP&A):

- Drive the company's financial planning and build a model that projects performance into the future
- Work with senior managers to efficiently develop budget proposals, provide access to project finance information, and ensure contract/grant compliance and reporting.
- Track performance over time, constantly research opportunities and economic trends, analyze internal operations to suggest improvements to performance.

Risks:

- Perform risk management through analysis of company liabilities and investments, evaluate and manage capital structure assisting in fundraising initiatives.

Capital markets:

- Help the company get the capital they need to endure and thrive
- Optimize the mix of capital between equity and debt where relevant
- Manage the company's investor base

Control:

- Ensure the company has accurate financial metrics
- Monitor business performance with tracking tools, establish corrective measures as needed, and prepare detailed reports for earnings calls, management team, and rest of company.

Your skills and profile

- B.E./B.Tech/M.E./M.Tech/MBA or any other post-graduate qualification from a reputed institute in business accounting or finance
- Proven track record in deeptech or comparable markets & in a scale-up is very appreciated.
- Demonstrated experience in managing financials, from day to day operational to long-term plans.

The **Gross Salary** will be defined based in the seniority and experience.
